

Lockport-Batavia Line #112 Rebuild Project

Appendix I

Filing Notice

PUBLIC NOTICE
NOTICE OF FILING OF
AN ENVIRONMENTAL MANAGEMENT AND
CONSTRUCTION PLAN – LOCKPORT-BATAVIA
LINE 112 REBUILD PROJECT

Subject: Case 22-T-0654 - Application of Niagara Mohawk Power Corporation d/b/a National Grid for a Certificate of Environmental Compatibility and Public Need Pursuant to Article VII for its Lockport-Batavia Line 112 Rebuild Project in Niagara and Genesee Counties

On or about June 17, 2025, Niagara Mohawk Power Corporation d/b/a National Grid (“National Grid”) intends to file with the New York State Public Service Commission (“Commission”) a proposed Environmental Management and Construction Plan (“EM&CP”) for the Lockport-Batavia Line 112 Rebuild Project (“Project”). The Project is National Grid’s proposal to rebuild approximately 21.7 miles of an existing 115 kilovolt (“kV”) electric transmission line, called “Line 112”. The western end of the Project would be immediately east of the first structure of Line 112, which is located just outside the Lockport Substation in the City of Lockport. The eastern end would be at (and include) the line’s Structure 211 in the Town of Alabama. The Project would rebuild all of existing Line 112 between those two structures, except for an approximately 1.9-mile section thereof on the site of the Western New York Science and Technology Advanced Manufacturing Park being developed by the Genesee County Economic Development Center, which is not part of the Project. The facilities the Project is to replace are over 110 years old and have reached the end of their service lives. The Project will bring Line 112 up to current National Electrical Safety Code standards, and will improve the safety, performance, and reliability of the National Grid transmission system.

EM&CP

The EM&CP describes the construction procedures and environmental protection measures proposed to be used for the Project. Included in the EM&CP is information relating to the specific location of the proposed construction procedures and environmental protection measures to be implemented for the Project. National Grid developed the EM&CP’s environmental protection measures in coordination with the New York State Department of Environmental Conservation, the New York State Department of Agriculture & Markets, and the Department of Public Service Staff. National Grid also developed archaeological and historical protection measures in coordination with the New York State Office of Parks, Recreation and Historic Preservation. The EM&CP has been filed with the Commission in compliance with the Commission’s “Order Adopting Terms of a Joint Proposal, With Conditions” issued and effective September 24, 2024.

An electronic version of the EM&CP will be available for public inspection online at the Commission’s Document and Matter Management page for this case, which can be found by visiting the Commission’s web site (<http://www.dps.ny.gov>), clicking the “Search” tab, and entering “22-T-0654” in the “Search by Case Number” box.

The EM&CP will also be available for public inspection during normal business hours at:

Lockport Public Library
23 East Ave
Lockport, NY 14094
