PUBLIC OUTREACH PLAN

This section includes the description of the Project outreach efforts made to inform and educate the public on the construction of the electric transmission facilities, including substation upgrades, for the Lockport-Batavia Line 112 Rebuild Project (“Project”).

Section 1: Construction Commencement Information (Ordering Condition 38)

A Construction Commencement Notice will be provided to the public two weeks prior to the start of any Project construction, notifying them of the timing of planned construction in the area. The notice will include: a Project map; a Project description; the anticipated construction start date and estimated completion date; the contact information for the receiver of complaints for the Project; where to get more information, including the Project website; a statement that the Project is under the jurisdiction of the New York State Public Service Commission; emergency contact information and contact information for the Public Service Commission representative for the Project. A sample notice is contained in Attachment K-1.

The Construction Commencement Notice will be disseminated in the following manner:

- **Local Notifications**

Local officials and personnel, along the entire Project route, will be provided with a copy of the Construction Commencement Notice via mail or email. A list of officials is contained in Table K-2 in Attachment K-2. The list includes municipal officials, Niagara County Emergency Management, Genesee County Emergency Services, emergency personnel, local school districts, and impacted utilities.

- **Local Media**

National Grid will provide the Construction Commencement Notice to local media for dissemination, which may include local newspapers of general circulation and a free publication (if available).

- **Public Places**

The Construction Commencement Notice will be posted in each Town Hall along the project route, as well as at least one post office or library in or near each affected municipality. The notice will also be conspicuously posted in public places in the Project area, such as convenience stores and community centers. The notice will also be posted on the Project website.

- **Landowners and Residents**

All landowners and/or residents whose properties are crossed by or abut the Project right-of-way (ROW) will receive two notifications prior to the start of construction. The first will be the Construction Commencement Notice required by Condition 38, as noted above. Along with

mailing notices to the mailing address on record, notices will be addressed to the landowner at their situs address and labeled “or current resident” to alert non-landowner residents. When the building is an apartment building with multiple separate dwelling units, then the notice may be affixed to the main publicly accessible door of such apartment building or prominently posted in another common area as permitted by the owner. The Construction Commencement Notice will be provided at least 14 days prior to the start of Project construction.

A second, geographically targeted notice will be sent via mail prior to the start of construction in that specific area. This notice will be mailed at least 7 days, but not more than 30 days prior to construction start in the area. Along with the notice being mailed to the mailing address on record, the notice will be addressed to the landowner at his or her situs address and labeled “or current resident” in order to capture non-landowner residents. If the building is an apartment building with multiple separate dwelling units, then the notice may be affixed to the main publicly accessible door of such apartment building or prominently posted in another common area as permitted by the owner. The notice may be provided via door-to-door outreach in addition to the direct mailing noted above.

Section 2: Project Hotline, Project Website and Procedures for Response to Complaints and Inquiries

- **Project Hotline (Ordering Conditions 35, 36, 38)**

A local Project phone number (716-466-2007) has been established for people seeking additional information about the Project. The hotline enables callers to leave a message for a member of the Project team to contact them. The Project Engagement Specialist will be the primary point of contact for the hotline, and shall respond to such members of the public with acknowledgement of the receipt of the inquiry or complaint within one (1) business day

- **Project Website (Ordering Conditions 28, 30, 36, 38, 39)**

A Project website (<http://lockportbataviatransmission.com/index.htm>) was created, which includes the Project fact sheet, construction map, visual simulations, and links to the Document and Matter Management (DMM) page for the Project’s case on dps.ny.gov where the EM&CP is accessible. The website also includes a documents repository, including copies of the Article VII Application, public notices, and PDF files of the EM&CP. A contact email and web form are included on this site to collect inquiries from the public, along with the local Project hotline number. The website will also contain general-level information for the public about Project activities scheduled to occur during the upcoming two-week period. The Construction Commencement Notice will be posted to the website at least two weeks before site preparation work begins.

- **Inquires and Complaints (Ordering Conditions 35, 36, 37, 38, 77)**

National Grid will respond to complaints in a timely manner. The Project Engagement Specialist

will be the point of contact for public inquiries and complaints. Construction field crews working along the ROW will be supplied with the Project information crew pad, Project field cards, and/or door hangers, which will include contact information for the Project team (*i.e.*, the local Project hotline number and Project website URL).

National Grid will endeavor to report all inquiries from the public to DPS staff on a weekly basis, noting which inquiries are closed, and will report to DPS staff complaints that cannot be resolved within ten (10) business days after receipt of the complaint.

Inquiries and complaints received, along with any resolutions, will be reviewed during the monthly site-compliance audit with DPS Staff. Other significant comments, suggestions, and communications from/with the public, local governments, and other agencies will also be reviewed during the monthly audit.

Section 3: EM&CP Available for Public Inspection (Ordering Condition 30)

One hard copy or one electronic copy of the EM&CP (at the election of the library) will be located in the following local libraries for public inspection. PDF files of the EM&CP and a link to the EM&CP on the DMM page for the Project's case on dps.ny.gov will also be provided on the Project's website (<http://lockportbataviatransmission.com/index.htm>).

Lockport Public Library
23 East Ave
Lockport, NY 14094
(716) 433-5935

Haxton Memorial Library

Oakfield, NY 14125
(585) 948-9900

Royalton Hartland Community Library
9 Vernon Street
Middleport, NY 14105
(716) 735-3281

Section 4: Hazardous Materials (Ordering Condition 15)

A letter containing a list of on-site hazardous chemicals and waste will be sent via mail, email or hand delivery to the local fire departments and emergency management agencies listed in Table K-2 in Attachment K-2. Safety Data Sheets for these materials will be available upon request.

Section 5: Municipal Notice of After-Hours Work (Ordering Condition 52)

If work is required outside of Monday – Saturday 7:00 am – 7:00 pm, the municipality where that work is being performed will be notified via telephone or email, whichever the municipality prefers, and request DPS approval. The notice and request for approval will be given at least 24 hours in advance of the work unless the construction activities are required for safety reasons that arise less than 24 hours in advance.

Section 6: Traffic Plans (Ordering Condition 9, 82, 83, 86)

National Grid will coordinate as needed with the appropriate State, municipal agencies, and police departments regarding the traffic management of roads during construction. Prior to the start of construction, these agencies will be sent the traffic management plans contained in Appendix X for their reference. A list of contacts is provided in Attachment K-2. As construction progresses, these agencies will be provided updates on construction start dates as appropriate for the construction phase and what roads will be impacted.

Section 7: Unauthorized Access (Ordering Condition 62 & 80)

In order to safeguard unauthorized access to the ROW, National Grid will provide safety information in its Project notices, asking the public to stay away from the ROW and construction areas. Signage will be posted at ROW edges where the ROW intersects public roads and other areas as needed.

Once construction is complete, National Grid will notify abutting landowners and residents on utility ROW safety and trespass. The Project Engagement Specialist will also contact local law enforcement officials regarding ROW trespass prevention. The law enforcement officials are listed in Table K-2 in Attachment K-2.

ATTACHMENT K-1
SAMPLE CONSTRUCTION COMMENCEMENT NOTICES**

SAMPLE CONSTRUCTION COMMENCEMENT NOTICE

Construction Commencement Notice

Lockport-Batavia Line 112 Rebuild Project
Case 22-T-0654

Niagara Mohawk Power Corporation (doing business as "National Grid") anticipates that it will commence site preparation and construction of its Lockport-Batavia Line 112 Rebuild Project on or about [Month Day, Year].

The Lockport-Batavia Line 112 Rebuild Project will focus on the northern 20 miles of an existing 115,000 volt (or 115kV) electric transmission line that runs from the City of Lockport in Niagara County to the Town of Alabama in Genesee County, traversing the Towns of Lockport and Royalton in Niagara County, all in New York.

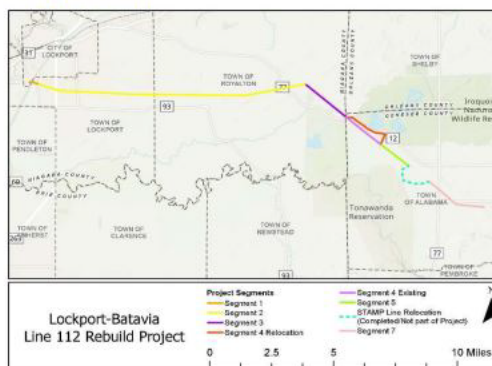

The Project Map shows the Project location, which is where site preparation and construction will take place. Construction is expected to start on approximately [Month Day, Year] and is estimated to be completed on approximately [Month, Year]

This Project is under the jurisdiction of the New York State Public Service Commission, which is responsible for enforcing compliance with environmental and construction conditions. The Public Service Commission may be contacted at:

New York State Department of Public Service
Environmental Certification and Compliance Section
Empire State Plaza Agency Building 3
Albany, NY 12223-1350
Telephone: 518-474-8702

National Grid is giving this notice to local officials, emergency personnel and local media in the Project area and arranging for it to be displayed in public places.

SAMPLE AREA-SPECIFIC CONSTRUCTION COMMENCEMENT NOTICE

Construction to Start in Your Area

Lockport-Batavia Line 112 Rebuild Project

Case 22-T-0654

Date: TBD

nationalgrid

National Grid's Lockport-Batavia Line 112 Rebuild Project is a proposed transmission line project that will rebuild aging electric transmission infrastructure. The rebuild will focus on the northern 20 miles of an existing 115,000 volt (or 115kV) electric transmission line that runs from the City of Lockport in Niagara County to the Town of Alabama in Genesee County, traversing the Towns of Lockport and Royalton in Niagara County, all in New York.

Construction is about to begin in your area. The work will be performed by National Grid and its contractors and subcontractors. The work is detailed below. Should this work not start within the next 30 days, you will receive an updated notification.

General Construction Phasing:

- Phase 1: Establish site access roads and site preparation, including environmental protections.
- Phase 2: Excavation and foundations installed (where applicable) and new monopole structures erected.
- Phase 3: Conductor (wire) strung, existing lattice structures removed and recycled.
- Phase 4 (final): Ground surface restoration.

Please note, construction phasing is intermittent and there will be times of no activity.

Anticipated Construction Schedule:

- Construction Start: TBD
- Construction End: TBD

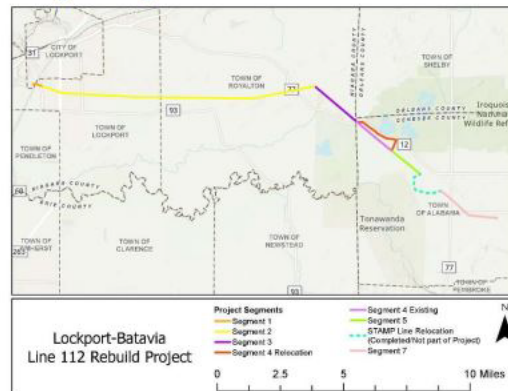

Construction Updates:

Updates on construction work can be found on the project website. The website is updated regularly. You may also call the project local phone line for updates 716-466-2007.

Safety Message:

National Grid is committed to the safety of its staff, contractors, and neighbors. For your safety, do not enter construction sites or marshalling yards during construction. If you have questions, concerns, or complaints, please contact the project team. If there is an emergency, please call 911.
